PROFILE

Software Engineer with over three years of experience in designing and developing Full Stack web applications, specializing in .NET Core, Node.js, Python and React, with a strong foundation in Artificial Intelligence. Proven ability to deliver high-quality software solutions, showcasing excellent problem-solving skills and a deep understanding of various technologies while adhering to best development practices. Passionate about creating innovative solutions that truly make a difference.

WORK EXPERIENCE

SOFTWARE ENGINEER

Bayteq | Quito | March 2022 - Present

- Developed AI-driven solutions, mainly integrated with technologies from Microsoft, OpenAI, IBM, and Google, to enhance user experience and customer communication through multiple platforms for well-known companies in the health and finance sectors, as well as to drive automation and process optimization in companies across Ecuador.
- Played a key role in the development of the e-commerce platform for a major medical insurance company, using .NET and Angular, optimizing the shopping experience and significantly enhancing customer loyalty towards the company's services.
- Contributed to the .NET development of an electronic billing system for a leading company specializing in digital payment solutions, successfully automating and streamlining the invoice generation and delivery process, improving operational efficiency and accelerating the delivery of its services.

SOFTWARE DEVELOPER (INTERSHIP)

SIS ECU 911 | Quito | July 2021 - March 2022

PROJECT: Management System for Operational Leaders - Operations Directorate

- Led the development of a web platform using Angular, Python, and PostgreSQL to optimize the collection of metrics and assessment of the institution's operations nationwide.
- The platform is used by managers and operational leaders on a weekly basis to manage the performance of command centers nationwide in real time and from a centralized system, significantly improving operational efficiency and decision-making.

SKILLS

- Communication
- Creativity and Innovation
- Teamwork
- Leadership
- Research
